

Consent for answers to questionnaire

Hello,

We are currently conducting a broad survey on the use of information and communication technologies (ICTs) by post-secondary students in Quebec. If you agree to take about 15 minutes to answer this survey, you could win one of several prizes in our draw ([hyperlink to prize page](#)), which will take place on May 4th, 2011. If you are taking courses at more than one post-secondary institution, please answer the survey only once.

We also want to set up about 60 20-minute group interviews on Skype, in-person interviews with people in Montreal, Quebec City, Sherbrooke or Trois-Rivières (10), and in-person work observation sessions in Montreal, Quebec City, Sherbrooke or Trois-Rivières. If you agree to allow us to contact you for one of these complementary components of the study, please enter your contact information at the end of the questionnaire. This information will not be used for any purpose other than to contact you for these interviews and will not be shared with anyone. Further information about your participation in these complementary components of the study will be sent to you later on. Please print and read the complete consent form ([hyperlink](#)).

Thank you very much for helping advance our understanding of the use of ICTs by post-secondary students. This information will be used to inform certain decisions about the integration of ICTs in courses. Please feel free to contact us for further information.

This project received an ethics certificate from the Université de Montréal. Any complaint related to your participation in the study can be addressed to the Université de Montréal ombudsperson at (514) 343-2100 or ombudsman@umontreal.ca (**the ombudsperson accepts collect calls**).

Please note that the masculine form is used in the survey to simplify the text and that it is intended to designate both women and men.
